Spent most of my career on design leadership in consulting and agencies, across consumer and enterprise products. Whenever a new client or market came in, I was the designer chosen to make the first impression and build the relationship.

Left Deloitte a few months ago to work independently, shipped an app, built an AI design to code workflow, and took on freelance work. I'm comfortable making product decisions and living with the tradeoffs, not just designing and prototyping screens.

What I bring

- Making product decisions under uncertainty, and holding them.
- Protecting product quality without blocking progress.
- Raising the level of design thinking around me.

Selected Projects

Herc Rentals USA

Web & Mobile App

Product Designer on the redesign of Herc Rentals' web and app, a B2B real-time fleet management platform, in a cross-functional team with the US client. Dense operational data, live equipment states, complex workflows. Built the visual language and the design system from scratch.

Vodafone Broadband UK

Mobile App

In-house in Vodafone's Broadband app Global team, working closely with engineering and research. One product, many markets, each with its own rules. Made deeply technical network controls feel clear to people who just want their Wi-Fi to work.

Pizza Hut

Mobile App

Led the design vision and foundations of Pizza Hut Portugal's mobile app redesign, from competitive analysis to delivery. New design system carrying the new brand, simpler core flows. Balanced brand expression with user simplicity.

Experience

Independent Product Designer

Building with AI
Nov 2025 - Present

Designed, built, and shipped solo with AI.

Patina: Designed and shipped solo. App live on Google Play.

Zebra Finch: Bidirectional Figma to code workflow where AI generates interfaces using only the design system.

Freelance: Brand identity for a fitness startup.

Deloitte Digital

Product Design Lead & Manager
2019 - Nov 2025

Worked across long-term product engagements with different clients, in cross-functional and international teams. Often brought into teams to help set direction, unblock decisions, and raise the quality of product thinking. Mentored designers and ran internal AI training for more than 40 designers.

Seara.com

UX/UI Designer
2007 - 2019

Took engagements end to end, from problem framing to delivery. Grew from junior to senior over the years. Designed the proposal that won the agency Sonae as a client, Portugal's largest retail group, in a competitive pitch.

Education

Multimedia Design Bachelor's Degree
